

Fire Flex® Upper Exhaust Hose Technical Data Sheet

Fire Flex® High Temperature Exhaust Hoses

Masterduct, Inc.'s newest product additions, **Fire Flex® Exhaust Hoses**, are manufactured for the sole purpose of meeting the high-temperature exhaust fumes market for rapid response services.

The Masterduct, Inc. Fire Flex® upper exhaust hose is designed for high-temp exhaust applications for both, pump check and normal idle exhaust.

The upper exhaust hose is engineered with high-temp, flame retardant materials that have excellent heat stability, are extremely flexible, and are puncture and tear resistant.

Hose diameters are offered in a 4 inch and 5 inch and are available in varying lengths from 20 feet to 43 feet, to meet your system requirements.

Our Fire Flex® upper hose is capable of operating at continuous temperatures of 700°F (371°C) and intermittent temperatures of 800°F (426°C).

The Fire Flex® upper hose can be used for replacement of an upper exhaust hose or for a new source capture exhaust hose system.

Features

- Extreme high-temperature resistant
- Puncture/tear resistant
- Flame Retardant
- Temperature range up to 700°F/800°F

Hose Diameter by Size

- (4" x 13') four inches by 13 foot
- (4" x 20') four inches by 20 foot
- (4" x 25') four inches by 25 foot
- (4" x 33') four inches by 33 foot
- (4" x 43') four inches by 43 foot
- (5" x 13') five inches by 13 foot
- (5" x 20') five inches by 20 foot
- (5" x 25') five inches by 25 foot
- (5" x 33') five inches by 33 foot
- (5" x 43') five inches by 43 foot

Masterduct, Inc. raises the bar and sets a new standard for high-temperature exhaust hoses that meet the demands for the rapid response service industry.
